

Many types of research related equipment require significant capacity from the building's basic utilities infrastructure including:

- Autoclaves
- Freezers
- Fume Hoods
- Electric Furnaces
- Lasers
- Electric Motors >2hp, 1ph
- Electric Motors >5hp, 3ph
- Natural Gas
- NMRs
- Other Gases
- Uninterrupted Power Supply
- Water-cooled refrigeration (not recommended)
- Servers
- DI/RO water
- Workstations

The University is committed to reducing the environmental impact of its research. The University of Toronto Sustainability Office (St. George), Environmental Affairs Office (UTM) or the Sustainability Office at UTSC would be pleased to assist you in mitigating the environmental impacts of your research.
