1. Proposal Narrative

Attach a proposal narrative to the cover sheet. Maximum two (2) pages written jointly by the Principal Investigators at University of Toronto and Huazhong University of Science and Technology. The narrative must include the following elements and address the 7 criteria in bold:

- Substantive description of the research collaboration and activity;
Main goal(s) for the collaboration and how it will contribute to innovation and future technology of well-being;
Proposed research activities;
Milestones and specific outcomes expected (i.e., publications, workshops, agreements, etc.);
Metrics of success for the planned activities (i.e., how will success of the program be evaluated).
- Brief statement of how the project builds on and fits into the priorities of the participants.
- Follow-on funding plan that explains how the research launched by this grant will be continued if successful.
- Current and pending support from other sources relevant to the activities proposed for this grant. Include project/proposal title, funding source, award amount, award period, relationship to the currently proposed project. For ongoing work or projects that build off existing work, clarify what the grant will add to work already undertaken.

Projects will be evaluated holistically based primarily on the following qualities:

- **All projects need a direct connect to the innovation and future technology of well-being;**
- **Quality:** the academic merit of the proposed work
- **Impact:** expected impact. If research, the likelihood of it gaining wide recognition, the ability to cut across disciplines.
- **Innovation:** the extent to which the project will contribute to novel thinking and/or new technology in its field.

- **Sustainability:** the likelihood that the project will lead to sustainable results and long-term international relationships and generate significant external funding.
- **Team Strength:** participants demonstrate high levels of commitment, enthusiasm for collaboration, relevant experience, and joint planning.
- **Design:** of proposed activities, milestones, metrics of success, and budget (reasonable expenses for anticipated results).
